Attachments: VDR Index_19-March-2009.XLS

Matt,

Thanks for following up – I was just getting ready to send you the attached data room index for Project Venice. Please note, this index was current as of March 19, 2009. We are not representing that this is a complete list of all documents available in the Data Room throughout the negotiations, but it does provide information on the categories/types of documents available there. Please note, the documents related to Simandou are all those beginning with the “SI” doc id (row 1243).

Thanks,
Meghan

Subject: Rio Tinto v. Vale et al., 14 Civ. 3042

Eric and Meghan,

During our meet and confer last week on September 24, we discussed that several of Rio Tinto’s document requests to Vale reference the documents allegedly available to Vale in the Data Room during the negotiations between Rio Tinto and Vale. (See, e.g., Requests 8, 12, 33, 34, 35.) We have a copy of what purports to be a list of items in the Data Room but do not know whether it is what you are working from. It contains well over 100 documents on subjects ranging from auditors reports, to environmental management, to joint venture documentation, to mining authorities, to statutes. We cannot conceive that your request would be intended to reach all of these documents. In a spirit of cooperation, we suggested that it might be productive for you to share with us what you believe to be in the Data Room and an accurate Data Room index as well as to specify the particular documents from that Index you intend the document request to

reach. You stated that you thought that suggestion might be productive and wanted to think about it. We have yet to receive either an Index or a suggestion with respect to particular documents on the Index. Please let us know if you plan to provide that information in advance of our meet and confer today.

Regards,

Matt

Subject: Rio Tinto v. Vale, et al.: Meet and Confer on Vale Obj. and Resp. to Rio Tinto Discovery Requests

Eric and Meghan,

Thank you for meeting with us on September 4, 24, and 30, 2014 to discuss Rio Tinto's first request for the production of documents to Vale. We write to confirm the positions Rio Tinto has taken during the meet and confers to date.

Definitions and Instructions:

- With respect to your proposed timeframe of January 1, 2005 to the present, Vale has objected and proposed May 1, 2008 to April 30, 2014 as the general time period, except with respect to Simandou North, which would be January 1, 2005 to December 31, 2006, or as otherwise noted with respect to specific requests. In response, you stated that the start date should be January 1, 2005 but that you would be prepared to accept a start date of January 2006 if we agreed to the same start date with respect to Vale's requests to Rio Tinto, and you indicated that you may accept a 2010 cut-off on some requests, or a April 2011 cut-off that coincides with Rio Tinto's settlement with the Government of Guinea, and might be willing to exclude documents related to operation of the Vale-BSGR joint venture. We noted that the relevant time periods for Rio Tinto and Vale are not the same, as Rio Tinto's involvement with Simandou dates back much earlier, at least to 1997. We did not come to agreement on this issue.
- Regarding the definition of "Defendant," you indicated that, as originally drafted, the term "Defendant" included Lev Ran and Noy, who are not named as defendants in the amended complaint but are identified as co-conspirators and that you expected that we would include Lev Ran and Noy where the Request calls for documents of or relating to co-conspirators. In the meet-and-confers, we did not identify any Requests yet to which this would apply and this issue remains to be resolved.

Document Requests:

- Request 1. The Request calls for all documents relating to (1) Vale's "interest" in acquiring Simandou, (2) Simandou's value, (3) the quality of Simandou's iron ore, (4) market assessments of Simandou, and (5) Vale's efforts to acquire Simandou. With respect to (1)-(4), you refused to limit those requests. We noted that we believed that those Requests were overbroad and called for irrelevant documents. In response to our questions regarding the relevance of all of these categories of documents, you identified the relevance as showing Vale's "motive," and also showing what knowledge about Simandou Vale gained from the Data Room. With respect to (5), you stated that the Request was intended to reach not just documents regarding *negotiations* concerning Simandou, but also any documents concerning Vale's overall designs on Simandou, from January 1, 2006 until the filing of the complaint, and includes any market analysis or internal discussions, including with respect to the importance of Simandou to the iron

ore market. Regarding efforts to acquire Simandou, you indicated that Vale's proposed timeframes for Simandou North (Jan. 1, 2005 to Dec. 31, 2006) and the Rio Tinto negotiations (May 1, 2008 to June 30, 2009) are acceptable, but that the timeframe for the BSGR negotiations (July 1, 2009 to April 30, 2010) is not because you allege Vale was talking to BSGR earlier, including in Dec. 2008. You also stated that the Request is intended to capture informal discussion with other companies, and also any negotiations with the Government of Guinea, starting in 2005 and going forward in time.

- Request 2. This Request calls for all documents “by, between, or among Defendants relating to the matters alleged in the Complaint.” You stated that this Request was intended to call for (1) all documents concerning Simandou and (2) all documents relating to the matters alleged in the Complaint. You refused to narrow the Request except as indicated below. We noted that the Complaint was lengthy, had a large number of different paragraphs and allegations, and addressed numerous different matters—including Rio Tinto's operations in Simandou dating back to 1997; Vale's interest in Simandou North back to 2005; BSGR qualifications in the mining industry; BSGR's efforts to obtain Simandou; the value and geology and transportation information of Simandou; the operations of Simandou over a period of more than a decade; and shifts in Guinean politics throughout this period—and that the Simandou site is, as you allege, one of the largest iron ore deposits in the world and which has been under development since at least 1997 in an undertaking you describe as being of “historic scope.” You stated that you would be open to excluding from the request documents that we identified and you agreed related to “operational matters.” We explained that it was incumbent on you to specify the particular subjects as to which discovery was appropriate and that the burden was not on us to explain documents that were irrelevant. We also explained practical problems with your approach. We did not reach agreement on this Request and it remains to be discussed.
- Requests 3-6. You indicated these Requests were acceptable to you as narrowed in Vale's Responses and Objections.
- Request 7. This Request calls for all documents concerning Vale's “views, opinions, analysis, and conclusions regarding the validity of Rio Tinto's Concession.” You have objected to our proposed date restriction (May 1, 2008 to April 30, 2010) because you claim to know of Steinmetz (not Vale) making statements regarding the legitimacy of the Concession outside that time period. You reiterated that the time period for the request is 2005 to April 2011, when Rio Tinto settled its dispute with the Government of Guinea, but stated that you would be prepared to agree to a start date of 2006 if we agreed that start date applied to Vale's requests to Rio Tinto. We will consider your request.
- Request 8. You indicated this Request was acceptable to you as narrowed in Vale's Responses and Objections.
- Request 9. This Request covers all documents concerning “the decision to cease negotiating the joint venture . . . regarding Rio Tinto's Concession.” You clarified that “cease negotiating” does not refer to cessation of negotiations in June 2009 (which as you acknowledged was not initiated by Vale) but to Vale's alleged decision to cease negotiating in “good faith” (words not found in the request) and conspire with BSGR instead, and was intended to capture any internal discussion on that alleged decision. You propose a time period of May 2008 through June 2009.
- Request 10. This Request seeks all documents concerning “meetings or discussions with Rio Tinto regarding Rio Tinto's Concession.” You stated you did not agree to Vale's limitation of this request to the November 2008 – June 2009 New York meetings alleged in the complaint because you say there were meetings elsewhere (e.g. Perth in May 2009). Your position is that the time period for this request should be from May 2008 to June 2009. We will consider your request.

- Request 11. This Request seeks all communications between Vale and any defendant regarding “Rio Tinto’s Concession.” Rio Tinto’s Concession is defined in a manner that would include all documents regarding Simandou regardless of whether, at the time those documents were generated or for the time period to which they refer, Rio Tinto had any rights in Simandou. You refused to narrow this request. Vale does not agree to search for documents for this Request dated after the Government of Guinea’s revocation of Rio Tinto’s concession in December 2008. Not only are such documents irrelevant, but the number of documents would be enormous owing to the fact that “Concession” is defined to include the area awarded to BSGR and operated for years by Vale and BSGR as a joint venture. The request would therefore pick up communications regarding, for example, pricing, hiring of subcontractors, the quality of iron ore extracted, potential customers, and other operational communications.
 - In response to our suggestion that you limit this request by providing narrower topics, you stated that, aside from routine operations of the mine under the joint venture, you could not conceive of any communications regarding the Concession that would *not* be responsive and in your view relevant. You have declined to provide narrower topics you are interested in, stating that the request includes “any documents relevant to the efforts of defendants to acquire and/or keep the concession and to further the ends of the conspiracy, and to cover it up.” You have also stated your position that the time period for this request extends to April 30, 2014 (the filing of the complaint).
- Request 12. This Request calls for all documents concerning “the materials, information, documents, and other data [Vale] reviewed in the Rio Tinto Data Room” Thus, as we noted, the plain language of the Request would pick up not only all documents that constitute documents from the Data Room, but also all documents referring to documents from the Data Room and all documents containing the data that is also reflected in the documents from the Data Room. The Request would be practically impossible to satisfy and is enormously overbroad. We suggested that you provide us with what you believed to be an index of the documents in the Data Room and indicate which documents from the documents in the Data Room this Request is directed to. We stated that by specifying the documents in the Data Room to which the Request was addressed, we might be able to have a productive conversation about this Request. On the eve of our last meet-and-confer, you provided us with the Index. The Index is dated as of March 2009 and you cautioned it may not be complete; it contains well over 1,000 entries. You declined to identify specific documents in the index in which you are interested. You explained your view that Vale has “no information on Simandou ‘but for’ the information it obtained from Rio Tinto,” which would mean that all information concerning Simandou in Vale’s possession would be responsive to this Request. You stated that you would consider excluding certain topics from the documents in the Data Room but, as of the writing of this email, you have yet to do so. We look forward to your response.
- Requests 13 and 14. Request 13 calls for all documents “concerning any Communication regarding Simandou between Your directors, officers, employees, representatives, agents, or consultants and (a) any Defendant; (b) Ibrahaim Touré; (c) Moussa Dadis Camara; (d) Lansana Conté; (e) Pentler Holdings; (f) Nysco Management Corporation; (g) The Beny Steinmetz Group; (h) Onyx Financial Advisors; (i) Matinda and Co. Limited; (j) Marc Struik; (k) Yossie Tchelet; (l) Dag Cramer; (m) Sandra Merloni-Horemans; (n) David Trafford; (o) Asher Avidan; and/or (p) Patrick Saada.” Request 14 extends this request to internal communications within Vale concerning communications among those same entities and individuals. We attempted to provide a framework for treating sets of individuals:
 - For BSGR, The Beny Steinmetz Group, Struik, Tchelet, Cramer, Merloni-Horemans, Trafford, Avidan, and Saada, we objected to the breadth of the request noting that it would pick up all communications between joint venture partners regarding a mining development of historic

scope over a multi-year time period. We believe we are close to an impasse on this request but are prepared to talk further and consider any limitations you propose if you would like.

- For Nysco Management Co. and Onyx Financial Advisors, you agreed to consider a limitation on the scope.
- For Ibrahim Touré, we agreed to produce documents concerning communications with him preceding the formation of the joint venture but noted that he had a business role with the joint venture following the Vale-BSGR agreement and that the request with respect to him was therefore overbroad and called for irrelevant documents. You disagreed but our notes do not reflect that we concluded the discussion with respect to him.
- For Guinea Presidents Camara and Conté, both parties agreed to think further about this request.
- For Pentler Holdings and Matinda, we agreed to produce documents concerning communications by Vale or others with these entities.
- Requests 15 and 16. These Requests call for documents concerning transfers of gifts or value to these same entities and individuals from Vale or any defendant. Vale agreed to search for documents reflecting payments to any individual defendant, any other individual listed in this Request, Pentler Holdings, Nysco Management Corporation, Onyx Financial Advisors, and/or Matinda and Co. Limited. Vale objects to the extent these Requests cover transfers from Vale to BSGR or the Beny Steinmetz Group. Vale also objected to the Requests to the extent that they referred to payments from any of the individuals to BSGR as not being relevant. Vale noted that, as alleged, BSGR and Vale had a commercial relationship through the joint venture that lasted for years, and pursuant to which consideration and items of value were transferred in the ordinary course, which would not be relevant. You agreed that operational payments from Vale to BSGR may not be relevant but declined to provide a definition of the operational payments that were excluded and the transfer of value that was included in the Request. You stated that you are entitled to look at any and all compensation between Vale and BSGR regarding any aspect of their business relationship, even those unrelated to Simandou, if any.
- Request 17. This Request calls for information related to “allegations or rumors of bribery.” We agreed to consider expanding the subject matter of the Request beyond “payments or bribes” so as to include other allegations of wrongdoing in the Complaint. We will continue our discussion on this Request, particularly with respect to timeframe.
- Request 18. This Request calls for information “concerning BSGR’s and Steinmetz’s interest in . . . Rio Tinto’s Concession.” We asked why this would be relevant after June 2009, when negotiations between Rio Tinto and Vale ended. You asserted that the interest of Vale’s alleged co-conspirators would be relevant after June 2009, though you declined to articulate any reason why. Your proposed timeframe is 2005 or 2006 to at least April 2010 or April 2011.
- Request 19. This Request calls for information about BSGR “looking for a partner” for Simandou Blocks 1 and 2. You indicated that this request should cover BSGR’s interest in finding any partner in the marketplace, and not just its interest in partnering with Vale. You indicated your position that this request should start well before Vale and Rio Tinto entered into negotiations and extend to April 2010. We will consider your request.
- Requests 22-25. You indicated these requests were acceptable to you as narrowed in Vale’s Responses and Objections.

- Requests 37-38. You have stated you believe that Roger Agnelli's and Fabio Barbosa's departures from Vale are relevant, but have not provided any support for this proposition.
- Request 40. You indicated this Request was acceptable to you as narrowed in Vale's Responses and Objections.
- Requests 41-42. These Requests relate to communications with governmental entities. You have clarified that you are not seeking tax records. You took under advisement Vale's proposal that it produce substantive communications with government regulators, and documents produced to those regulators (both the DoJ and the Technical Committee), but not including non-substantive transmittal letters.
- Requests 44-50. These Requests call for, respectively, all documents prepared, provided to or received by Vale concerning (44) "Simandou concerning geological data, studies, analyses, [or] plans"; (45) "mining data and studies relating to Simandou"; (46) "rail transportation that relate to Simandou"; (47) "port data and studies relating to Simandou"; (48) "the Transguinean Railway or data, studies, and plans for a Transguinean railway"; (49) "a passenger railway or data, studies, and plans for a passenger railway relating to Simandou"; or (50) "data, studies, and plans regarding using ports in Liberia in connection with Simandou." You stated you wanted to make clear that these Requests did not just concern information Vale obtained from Rio Tinto and communications with BSGR but also would require Vale to produce documents concerning the above subject matters that Vale created itself and information it obtained from any third party, e.g., everything that Vale did independently with respect to Simandou, or that was prepared for Vale by a third party *other than Rio Tinto*. We have not agreed to this Request which is remarkably overbroad and believe we are close to an impasse.

Remaining Requests:

During our meet and confer on October 6, we have the remaining Requests to discuss: 20-21, 26-36, 39, and 43. In addition, we discussed (1) before we reach agreement on the scope of any of these requests, we would need to consider your objections and positions with respect to our requests to Rio Tinto; and (2) to the extent, we agree on the scope of a Request, we will need to discuss and try to reach agreement on (a) custodians and (b) search terms or a search methodology.

Best regards,

Esti
